

COVID-19: Health and Safety Update

We know that for many concerns around COVID-19, commonly known as coronavirus, are top of mind. The health and safety of The House on the Rock's guests and team members is always our top priority. We want to share our plans and actions regarding our operations in response to Coronavirus (COVID-19).

Updated March 13:

- The governor of Wisconsin has issued a public health emergency.
- There are no confirmed cases in Iowa or Sauk County, Wisconsin at this time.
- We are open and welcoming guests to The House on the Rock Attraction and The House on the Rock Resort. Should we make any updates for visiting The House on the Rock, we will post them for you here.
- Stringent sanitation procedures are already part of daily operations. In addition, hand sanitizers are available in convenient locations for guest use.
- We continue to implement preventative measures in line with recommendations from the CDC, state, and local health officials.
- This is a fast-moving situation and we are closely monitoring updates and guidelines for any changes to ensure we are prepared and planning accordingly.

We encourage everyone to take precautions to prevent the spread of COVID-19 and other viruses. The Centers for Disease Control and Prevention recommend:

- Wash your hands often with soap and water for at least 20 seconds especially after you have been in a public place, or after blowing your nose, coughing, or sneezing.
- If soap and water are not readily available, use a hand sanitizer that contains at least 60% alcohol. Cover all surfaces of your hands and rub them together until they feel dry.
- Avoid touching your eyes, nose, and mouth with unwashed hands.
- Avoid close contact with people who are sick.
- Cover your mouth and nose with a tissue when you cough or sneeze or use the inside of your elbow. Throw used tissues in the trash.
- Stay home if you are sick, except to get medical care.
- Put distance between yourself and other people if COVID-19 is spreading in your community. This is especially important for people who are at higher risk of getting very sick.
